

Bulletin 2026-03

Subject: Trout Lake Rally

Issue Date: 2026-09-26

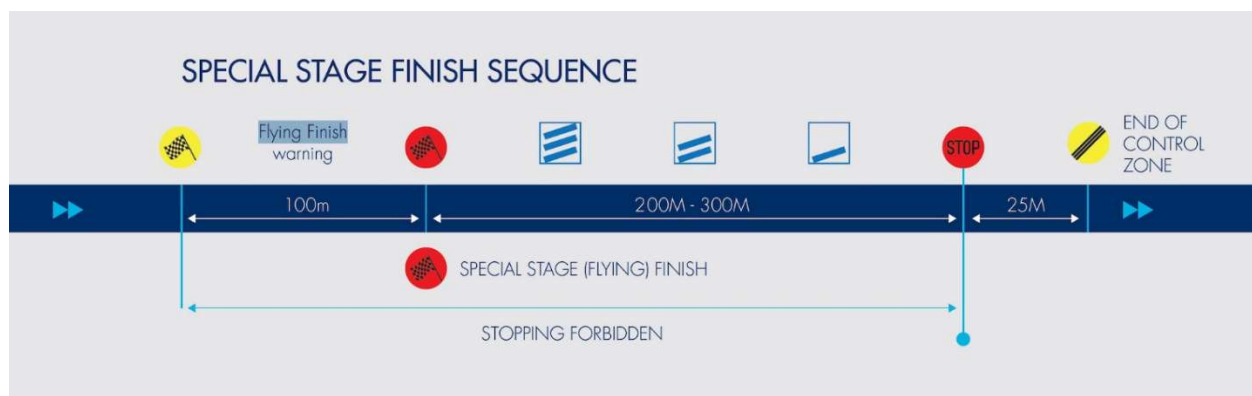

Effective Date: Immediate

This Bulletin provides additional information to the previously issued Supp Regs.

Deceleration Test:

The 2026 Trout Lake rally will be testing deceleration zone signage at the stage finish of stage Numbers. 3, 6, 7 & 8

The signage will be shown at the drivers' meetings and will consist of 3 signs with RED stripes on both sides of the road after the flying finish. For this event the signs are spaced approx. 75 meters apart.

Safety Purpose: Rapid braking right after a flying finish can destabilize a car's grip and balance.

Deceleration zones protect dense areas with media, marshals, and fans near the Stop Control post.

Further Bulletins will be issued as required.
